

Joel Biederman Biosketch

Joel Biederman is a research hydrologist at the Southwest Watershed Research Center in Tucson, Arizona. His work addresses the combined impacts of changing climate, land use, and disturbance on ecohydrological processes and their consequences for ecosystem services. Joel holds bachelor's and master's degrees in civil and environmental engineering from Montana State University. He completed his Ph.D. in Hydrology and Water Resources at the University of Arizona in 2013, where he earned the Centennial Award for Doctoral Achievement. Joel has held prior positions on the science faculty at Suffield Academy and as a research engineer at the Center for Biofilm Engineering. He currently serves in a term position at USDA and is seeking permanent employment in Southern Arizona or beyond!
